ESS

2N3773 Transistor Equivalent, Features and Applications

2N3773 is a high-power audio transistor in TO-3 type package, suitable for various linear applications, such as head positioner driver. In addition to power switching circuits, such as ...

Características y usos del transistor 2N3773

2 de ago. de 2024 · Descripción general del transistor 2N3773 2N3773 es un transistor de audio de alta potencia en el paquete de tipo TO-3, adecuado para varias aplicaciones lineales, como ...

2N3773

The 2N3773 is a PowerBase power transistor designed for high power audio, disk head positioners and other linear applications. This device can also be

used in power switching ...
